PRODUCT INFORMATION & WARRANTY

Technical Name	Decorative High Pressure Laminate
Size	1220 mm X 2440 mm (8' X 4')
Thickness	1 mm (Other thicknesses may available on request)
Quality Standard	Accomplish requirements of IS: 2046 (BIS)
Warranty	Xsso warrants that their products are free from any manufacturing defects and is suitable to utilize for normal and usual purpose only. It is recommended that the product should be inspected prior to installation. If found any visual defects, the product should not be used, cut or altered in any manner. Warranty will be limited to cost of the products only and no claims will be entertained after fixing, alteration or used of the product.
Note	Samples presented are indicative in all aspects i.e., colour, pattern, surface finish, thickness, etc. High gloss sheets are recommended for vertical application only. Other Combinations of colour, pattern and surface finish are available on special request.

PROTECTING THE SURFACE

Scratch and Impact Protection

Don't place lighted cigarettes directly on laminate surface. Knives or other sharp utensils may slice or scratch the surface. Don't chop, slice, pound or hammer on any laminate surface. Avoid ironing or placing a hot iron on laminate surface. Hot cookware should not be placed directly on laminate surface. Heavy blows of hammer or metal may crack the laminate surface.

Ordinary Cleaning

In most cases, only need to use a clean, damp, non-abrasive cotton cloth and a mild liquid detergent or household cleaner and rinse with clean water. Don't flood the laminate since water can be absorbed and results substrate to swell. Dry the surface with a soft, clean and non-abrasive cotton cloth.

Chemical Damage

Never use cleaners containing acid, alkali or sodium hypochlorite. These cleaners will mar, etch, corrode and permanently discolour the laminate surface. Also make sure that bottles, rags and other materials contaminated with these cleaners never come in contact with the laminate surface.

DIRECTION OF USE

Before using laminate please ensure that the surface of plywood and laminate are clean, dry and free of other contaminations.

Please stir the adhesive before use and don't add water in it. Also, ensure that the applied adhesive is sufficient or not.

Once laminate is pasted in the plywood surface, don't forget to apply adequate pressure for perfect bonding. To remove air bubble from assembly use roller press from centre of assembly towards edge of assembly.

A gap of minimum 2 mm should be maintained between two laminates while pasting side by side.

For Seamless Cabinetry Systems

Seamlessly blend into the harmony of our laminates through edge bands that ensure a smooth transition of laminates without visually changing the designs. Ensured to give a flawless surface, these edge bands are a visual appeal for your interiors. Transform your surroundings with the beauty of uninterrupted perfection with our edge bands.

NO CLAIM WILL BE ENTERTAINED FOR AIR BUBBLES

NO CLAIM WILL BE ENTERTAINED FOR CRACKING ARISING OUT OF GROOVE CUTTING OR L.SHAPE
